Kårer Årets båtkommune for fjerde gang

KNBF og Båtens Verden ønsker å hedre kystkommuner som gjør en ekstra innsats for å tilrettelegge for båtfolket. I år deles prisen «Årets båtkommune» ut for fjerde året på rad.

I fjor vant Midsund kommune prisen, og nå er juryen i gang med å kåre en ny kommune som fortjener heder og oppmerksomhet. Prisen deles ut under Sjøen for Alle av en jury bestående av Telenor Kystradio, Kystverket, Båtens Verden, Norboat og KNBF. I dette arbeidet vektlegges en omfattende undersøkelse til alle kommunene, nominasjoner fra publikum og en undersøkelse mot alle medlemsforeninger i KNBF.

Erling Sande og SeaDrive skal samarbeide

Erling Sande vil stå for salg og distribusjon av SeaDrive sine produkter, og avtalen som er inngått omfatter salg og distribusjon til nye båter og retrofit i gamle båter.

SeaDrive har utviklet løsninger innen elektriske motorer, modulare POD-konsepter, motorstyringer, styresystemer, batteriovervåkningssystemer og batteriteknologi. Selskapet, som er basert i Tønsberg, har røtter i Engbo Innovation. Erling Sande importerer Suzuki påhengsmotorer, dieselutenbordsmotorer fra Cox og fører båtmerker som Beneteau, Capelli og Ryds.

Frir til ungdommen – og moderskipet

BRIG har fornyet Eagle-serien de siste årene, og Eagle 4 er siste tilskudd med Norgespremiere under Sjøen for Alle. Båten erstatter Eagle 380, har fått samme DNA som de større RIBene i serien og frir til både ungdommen og til de med større båt som ønsker en tender.

Eagle 4 kan rigges med motor inntil 60 hestekrefter, men

skal også gå greit med 10 hk., som betyr at den passer godt til ungdom under 16 år. RIBen er påkostet med vannski- og lanternebøyle, integrerte navigasjonslys, en rekke valg av putetrekk og har integrert bensintank. Den kan også rigges med utstyr som kartplotter, CoastKey, USB-lader, solpute, stereo, for å nevne noe.

Dockmate med flere nyvinninger

STEFFEN GREFSGÅRD hos SG Marine demonstrerer Dockmate Twist.

Nå har vi nylig fått beskjed om at Volvo Penta godkjenner Dockmate som tredjeparts-integrasjon mot sine motorer og systemer, og det er veldig stort å få til, forteller Steffen Grefsgård hos Dockmate-importør SG Marine.

Han trekker spesielt frem integrasjonen og mulighetene mot Volvo Pentas IPS-system, og viser frem en av de trådløse fjernkontrollene. Kort forklart gir Dockmate mulighet til å styre motorer, thrustere, ankervinsj(er), lydhorn, hydraulisk badeplattform og andre komponenter trådløst. Med andre ord kan du stå på dollbordet og legge til med hjelp av en fjernkontroll.

– Med denne kontrollen, Dockmate Twist, koblet opp mot IPS, kan du styre begge motorene og «twiste» joysticken akkurat som på IPS-joysticken. Dermed fungerer den ypperlig som en trådløs uteposisjon med full IPS-styring, forklarer han. I sortimentet til Dockmate finnes flere forskjellige fjernkontroller avhengig av ønsket bruk. – Vi kan koble oss mot de aller fleste båter med elektronisk motorstyring. Det gjelder også båter med utenbordsmotorer. For Sleipner sine trinnløse thrustere er det også mulighet for hastighetskontroll på fjernkontrollen, avrunder Grefsgård.

Dockmate® | Wireless Remote Control

DOCKMATE® · UPDATED: APR 29, 2020 · ORIGINAL: APR 17, 2020

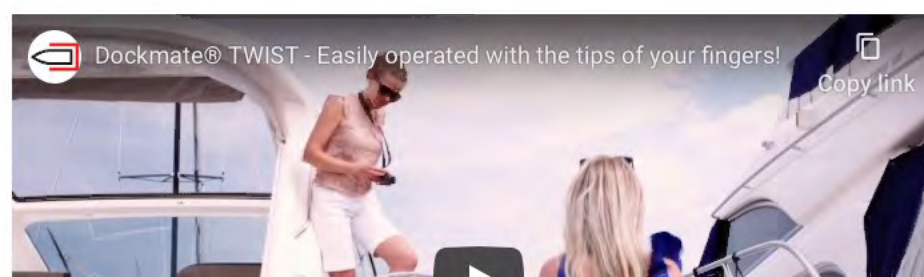

Right NOW is the best time to go boating with your loved ones and Dockmate will make your experience even more enjoyable!

Dockmate® is the world's most advanced, affordable and safest wireless remote control system. With industry leading technology the Dockmate® system provides a stress free docking experience. You are able to leave the helm and get a closer look at your surroundings while still in complete control of the boat's movement, resulting in total control during typical maneuvering in marinas and tight quarters.

"Dockmate® has given us more confidence in handling our boat in close quarters." -Bob Arrington

Make Boating More Fun!

Make Boating More Fun!

Communication - Dockmate's highly reliable TWO-WAY transmission system uses Frequency Hopping Spread Spectrum (FHSS) technology that is commonly used today in Bluetooth, cell phones and Wi-Fi networks for secure and uninterrupted radio communication.

Make Boating More Fun!

Customization - Dockmate's DockControl software offers the ultimate in remote control customization and it can even provide improvements upon the existing propulsion controls. For example, the remote control settings can be programmed to "walk a boat" sideways towards a dock slip, even if the boat only has a bow thruster.

Proportional Engine Throttle - Dockmate® has relationships with several electronic engine control manufacturers and can offer *fully proportional throttle* with our Twist 3-axis joystick transmitters, and not just idle speed propulsion.

Proportional Thrusters - Dockmate® can also offer fully proportional throttle with systems from Side-Power and VETUS which also offer this tremendous benefit.

Award-winning Dockmate Remote Control System selected for New Summit 54

by Andrew Golden 30 Apr 17:39 AEST

Award-winning Dockmate selected for New Summit 54 © Andrew Golden

[Tweet](#) [Like](#) [Share](#) [Sign Up](#) to see what your friends like.

Dockmate, manufacturer of advanced wireless remote controls for yachts, announced today its award-winning Dockmate wireless remote control docking system has been selected by Summit MotorYachts, to be incorporated into the Summit 54. Summit MotorYachts is a new brand that lives under parent company Kadey-Krogen Yachts.

The Dockmate wireless remote-control docking system allows boaters to easily operate electronically controlled engines, bow and stern thrusters, anchor winches and horns from anywhere on board with a small handheld device. Each Dockmate system includes a rugged wireless, handheld transmitter with an easy-grip rubber finish, lanyard and wireless charger, as well as a plug-and-play receiver compatible with most brands of engines and thrusters.

"The Summit 54 is an exceptional build and the perfect platform for our Dockmate system," said Brian Sheehan, Dockmate U.S. spokesperson. "She was designed from the ground up to be a beautiful, long-range cruiser with exceptional features to enhance the comfort of the owners and crew."

"After considering many aftermarket electronics options, we chose to add Dockmate to our new Summit 54," said Tucker West, vice president of sales, Summit MotorYachts. "A product like Dockmate can always make your customers' experience, particularly in stressful situations like close-quarters maneuvering, just a little easier. We are confident our clients will appreciate the functionality that Dockmate provides."

The new Summit 54 is designed with beautiful exterior lines and her hull, with an impressive 330 nautical mile range at 23 knots, was developed by Michael Peters Yacht Design with exceptional seakeeping and performance capabilities. Notably different, inside and out, from other yachts on the market; the interior, designed by Espinosa Yacht Design and interior designer, Katie Astras, is hand-crafted to be classic with high-quality finishes throughout the main deck and lower accommodations. Kadey-Krogen Yachts is recognized by its 40-plus-year history of design innovation and is applauded for building more than 620 semi-custom, Pure Full Displacement™ trawler yachts.

Cold Wheels SeaSucker

Don't carry it. Pull that heavy cooler loaded with food and beverages down the dock. Cold Wheels from SeaSucker are 7-inch wheels with sealed ball bearings that mount on smooth-sided coolers in seconds with no need for drilling holes. For use over rutted and uneven terrain, Cold Wheels can be removed as quickly as they are installed, and they support up to 200 pounds by the sheer power of suction. The stainless steel hardware ensures years of maintenance-free use. When the integrated power button displays orange, a few quick pumps renews its holding power. seasucker.com

6

Handheld Remote Control Dockmate

Dockmate brings remote control of engines, thrusters, windlasses and horns to everywhere on board with a handheld device. The rugged, wireless transmitter operates within a 150-foot range and is available in four models: single, twin, Twist 3-axis joystick with proportional control, and Twist IPS for pod drives. It will automatically shut down after 30 minutes of non-use and is compatible with both 12v and 24v systems. A five-function Dockmate system includes control of two engines, a thruster, an anchor and a horn. dockmate.com

\$6,800

7

VHF Antenna Glomex Marine

The RA1225HP 8-foot Classic High-Performance VHF antenna from Glomex Marine is vertically polarized to minimize signal reflection on the water, so it works on inland, coastal and offshore vessels. With a frequency range of 156/162 MHz, this collinear-phased antenna has a gain average of 6 dB, maximum input power of 100W and 50 ohms impedance. Its internal elements are made of spiral copper wires inserted into brass radiator tubes, an arrangement that provides its range, clarity and power to enhance the radio's overall performance. The double-thick fiberglass tube has a smooth polyurethane finish and weighs only 1.6 pounds. glomex.us

8

Chartplotter Garmin

Chartplotters are getting uber powerful and feature packed, an example being the new GP5MAP 8612xsv from Garmin. The new plotter has a 12-inch full-HD in-plane switching (IPS) touchscreen display for wider viewing angles, superior clarity and sunlight readability, even for wearers of polarized sunglasses. It offers built-in support for all types of Garmin sonar and is preloaded with Garmin BlueChart g3 coastal charts, LakeVü g3 inland maps and Auto Guidance technology. Multiple displays can be flat-mounted edge-to-edge to create a sleek glass helm look, or mounted flush. garmin.com

About Dockmate:

Based in Fort Lauderdale, Florida, Dockmate manufactures the latest in advanced, yet very affordable wireless remote-control technology. Highly-reliable and intuitive, the Dockmate Single, Twin, Twist and Twist VECTOR systems allow every skipper to dock a boat singlehanded, offering the ability to leave the helm and get a closer look at the surroundings in marinas and other tight quarters, while still in complete control of the boat’s movement.

About SUMMIT MotorYachts by Kadey-Krogen Yachts, Inc.:

SUMMIT MotorYachts is a planing-hull motoryacht brand that lives under parent company Kadey-Krogen Yachts. Production of its flagship model, the Summit 54’, is happening now at Asia Harbor Yacht Builders in Kaohsiung, Taiwan. A long-standing, 25-year partnership with the privately-owned yard has produced a team of master craftsmen dedicated to building the finest yachts. The Summit 54’ is set to arrive and debut later in 2019. For more information about SUMMIT MotorYachts, visit www.summitmotoryachts.com and follow them on Instagram (@summitmotoryachts).
