DOCKMATE ANNOUNCES ENHANCED COMPATIBILITY WITH VETUS THRUSTERS

Manufacturer of Wireless Yacht Remote Controls Expands Integration With VETUS BOW PRO
Proportional Thrusters

Boortmeerbeek, Belgium. – Dockmate, manufacturer of advanced wireless remote controls for yachts, announced today the expansion of its integration with systems from thruster manufacturer VETUS.

Building on its already-successful partnership, Dockmate is now able to connect cleanly with VETUS BOW PRO proportional brushless thrusters. Through this integration, Dockmate allows boaters with VETUS BOW PRO thrusters to be in complete control of their boat's movement from anywhere on board, including away from the helm where visibility is often limited.

"In the realm of thruster solutions available to boaters, VETUS has a sterling reputation for innovation, quality and durability, with the aim of making boating easy and carefree for everyone," said Dirk Illegems, president, Dockmate. "By offering seamless integration, Dockmate's solutions offer VETUS customers incredible versatility. We are confident that this will make the boating experience more enjoyable by giving boaters even more control over their vessel in challenging situations."

"Through our partnership, the Dockmate team has demonstrated a deep understanding of the capabilities of our products and how to put that functionality to the best use," said Sander Gesink, VETUS Marketing Director. "We are very excited to be integrated with the Dockmate system with our BOW PRO-series thrusters. As safe, efficient maneuvering is one of the most difficult skills to master in boating, an investment in easy docking systems can transform the boating experience. Dockmate's remote docking system is intuitive and customizable and we know that our customers will make great use of the extra level of confidence that these systems provide."

About Dockmate®:

Dockmate® manufactures the latest in advanced, yet very affordable wireless remote-control technology. Highly reliable and intuitive, the Dockmate SINGLE, TWIN, TWIST and VECTOR allow every skipper to dock a boat singlehanded, offering the ability to leave the helm and get a closer look at the surroundings in marinas and other tight quarters, while still in complete control of the boat's movement.

About VETUS: Creator of Boat Systems

Founded in 1964, VETUS sets the global standard in the design and manufacturing of complete onboard boat systems—including engines, bow thrusters and anchoring solutions—for recreational and small commercial vessels. VETUS prides itself on innovation and engineers the majority of its 4,000+ product lineup in-house. The company's commitment to quality, reliability, and delivering superior customer experience has earned the trust of boaters, yacht builders, and marine training establishments all over the world.

VETUS has its headquarters in the Netherlands, with representation in 17 other countries and an unparalleled worldwide distribution and service network.
