

# VECTOR

The Vector joystick remote control is designed specifically for boats with Volvo Penta IPS and Zeus Pods & compatible with Mercury Joystick Piloting and Yamaha Helm Master.

- The joystick lets you move in any direction. It's as easy as pointing the joystick where you want to go.
- Control 2, 3 or more articulating engines or Pods.
- Control engines, Pods and horn with the proportional joystick.
- Control bow thruster, and one or two anchors with separate buttons.
- Operates Dynamic Positioning System (DPS) or Skyhook when installed.
- Engage High Mode.
- The thrusters can be fully incorporated into the joystick as well as accessed individually thorough the keypad.
- 3 Year Parts & 1 Year Labor Warranty
